In Design for Care, we'll show how service and information designers can work with practice professionals and patients/advocates to make a positive difference in healthcare.

Design for Care: Innovating Healthcare Experience by Peter ...

Over the past few years, design thinking has gained popularity for driving innovation for the world's leading businesses. The beauty of this methodology is that it's empathy-driven and intentionally cross-functional--tenets that are sorely needed in the siloed healthcare industry. Yet, healthcare is one of the last frontiers to embrace this human-centered approach to defining and solving problems--which is where the Design Institute for Health comes in.

How Design Thinking is Driving Innovation in Healthcare

integrates care with all parts of the health care system, including behavioral health and community-based providers and aligns payment with this care model. Over the past several years, New York has been a thriving incubator of health care innovation. New models for payment and care delivery, focused on delivering the
