How to Hook Up Temperature Controller ITC-1000

Great thread. I just got a new Inkbird ITC-1000 and the 'wrong' wiring diagram is printed on the controller with the neutrals going to the wrong pin. I looked at their website and they still have it backwards (this was a PDF I downloaded from their website). So both the website and the actual unit matched.

...

As day_trippr says, switching neutral (with the relay in the ITC-1000) doesn't meet code. You should really switch things around so that the relay switches the hot line. By any chance did you follow a wiring diagram from InkBird that showed switching the neutral? InkBird originally wired the ITC-308 to switch neutral instead of hot.
