PVC Rocket Engine is an excellent manual that guides the beginner, step by step, through construction and testing of the single use, homemade engine. At every step, safety is stressed. The book is complete in that it covers mechanical construction, fuel mixing/loading, igniter construction/placement, protection for long term storage, and testing.

Amazon.com: Customer reviews: PVC Rocket Engine: A do-it ...

Make sure your rocket engines are balanced for flight and do not fly an unbalanced rocket because some of these engines could cause serious harm or damage if they would hit you or your property. Some of the higher end engines have over 25lbs of thrust and this could cause some serious harm if it was unbalanced and flew off course.

EASY PVC ROCKETS - UFPR

Start by making the foam rocket. Wrap the foam around the PVC pipe, trim it to fit and use copious amounts of duct tape to secure it. Then cut the top of a 2-liter bottle (keep the cap on!) and tape it to the top of your foam rocket. Next, cut three fins and hot glue them to the base of the rocket.

How To Build a PVC Rocket - Layers of Learning

Chuck Knight of Pennsylvania, U.S.A. has developed simple to make "G", "H" & "I" Class KN-Sorbitol rocket motors, utilizing PVC (PolyVinyl Chloride) plastic tubing for the casing and requiring no special tools for construction. These motors incorporates a time delay and ejection charge for parachute deployment.

OD of the motor is 27 mm so the motor can be wrapped with tape to allow it to fit a standard 29 mm motor mount used in many rocket kits.

Richard Nakka's Experimental Rocketry Site

For perspective, below is a photo of a small, re-loadable PVC motor I have fired 4 times with an uninhibited grain of about 40 grams of rcandy. This is moderately large by my standards, having made mostly fireworks-type rockets burning 8 to 10 grams of this fuel. This small engine is part of a unit I am working on for developing an ejection system.
