Now, finally, we have found a way to do away with even this vestige of our biological past and to design species from the top down, working out what traits are desirable and undesirable to us and genetically engineering organisms accordingly. How much should this worry us? For many, the answer is “a lot.”

Should We Be Worried About GMOs? - Quillette

Should we be worried about ‘peak oil’? Every now and then, in reading about global warming and other environmental issues, I come across a reference to ‘peak oil’, usually as yet another example of how humans blindly pursue their own short-term interests, scarcely heeding the crisis that is waiting for them ahead.
